

Special Workshop Putting It All Together:

The Nuts and Bolts of Hormone Restoration
in Men and Women

Sangeeta Pati, M.D.,

Dr. Pati graduated at the top of her medical class at the University of Maryland School of Medicine, Baltimore, and served a residency at Georgetown University School of Medicine, Washington, D.C.

She has worked extensively in the U.S. and internationally as Medical Director for a 350-employee non-profit organization, Engenderhealth.

Dr. Pati is multi-lingual and is renowned in her field, having authored numerous scientific articles and addressed audiences both domestically and internationally.

Presented by: Sangeeta Pati, M.D.

WEDNESDAY, DECEMBER 8, 2010 • 9:00 a.m. – 5:00 p.m.
LAS VEGAS, NEVADA, U.S.

With a basic theoretical understanding of hormone restoration comes the challenge of putting it all together in practice. This program teaches clinicians how to restore optimal hormonal balance through restoring hormones and nutrients, removing toxicities and rebalancing the mind and the body.

The program will cover the protocols to measure and restore each hormone. Practical case applications will be the main modality of illustrating the use of the protocols. The objectives for learning are as follows:

Learn how to interpret laboratory tests (hormones, nutrients, toxicities) and prescribe therapy for women from ages 13 to 90, based on the individual's symptoms, examination, and lab results as regards:

- a) the full array of hormones
- b) nutritional supplements
- c) removal of toxicities
- d) balancing the mind, balancing the body

"My philosophy is to use the most natural solution to restore the body's balance on both the inside and the outside," says Pati, an obstetrician/gynecologist who specializes in natural hormone replacement, anti-aging and holistic, preventative medicine.

"A woman's annual visit to the doctor is a perfect opportunity to focus on prevention in a holistic manner, in addition to the PAP smear and mammogram. There is so much that can be done to prevent breast cancer, bone loss, heart attacks, stroke and cognitive decline."

Dr. Pati practiced obstetrics-gynecology in the Washington, D.C. area for 14 years before opening holistic SaJune Medical Center in Orlando, Florida. Dr. Pati helps each patient develop an aggressive preventative plan to restore optimal balance of hormones, nutrients while removing toxins.
